

## About us

### ***Functional coating from DSM***

®claryl picture framing glass offers an affordable and attractive solution for all framing work; whether it involves durable art or a precious memory. ®claryl picture framing glass is produced by DSM. It has been developed as part of the Functional Coatings program, which is intended to deploy the coating technology developed by DSM for a variety of applications.

### ***Sustainability – energy-efficient production***

The advanced production process with which ®claryl picture framing glass is made is energy-saving. This means that this innovative product can be produced with about 30% less energy than traditional anti-reflective glass. Moreover, ®claryl picture framing glass can be recycled in the same way as normal glass, which means that it does not have to be processed separately.
